

Hi Marcia,

I am attaching the write up I sent in to CBT for the grant we received to pay a coordinator to run the Bag project. It covers objectives, goals and deliverables, etc.

As of February 2010, we have a mentor program where experienced sewers are teaching new sewers the needed step in creating a product, how to insure quality and how to market it. We have also branched out into making small bags for food and are selling them in two local markets, as well as have procured a contract to make bags to carry newspapers. The possibilities are unlimited.

Let me know if you need anything else.

Oh, the news on the roses is that I can not find any guarantees on the work conditions for the women.

Cheers,

Kathleen
